

Proximal Humerus Locking Plate & Screw System

PROXIMAL HUMERUS LOCKING PLATE & SCREW SYSTEM

The One Surgical **Proximal Humerus Locking Plate & Screw System** offers multiple fixation options in a variety of configurations. It is intended for use in the proximal humerus. The plates are constructed of titanium alloy (Ti-6AL-4V) with a low profile proximal design and are used in conjunction with solid locking and non-locking titanium alloy screws.
