

# Variable Locking Elbow Plate & Screw System

# VARIABLE LOCKING ELBOW PLATE & SCREW SYSTEM

The One Surgical **Variable Locking Elbow Plate & Screw System** offers multiple fixation options in a variety of configurations. It is intended for use in the distal humerus and proximal ulna. The plates are constructed of titanium alloy (Ti-6AL-4V), and are used in conjunction with solid locking and non-locking titanium alloy screws.

## VARIABLE LOCKING ELBOW PLATE OPTIONS

### DISTAL HUMERUS, LATERAL

3 to 8 Hole  
Left and Right
